Polyethylene terephalate (PET) is a thermoplastic resin of the polyester family, widely used in the production of food and beverage containers. PET's popularity originates from its high clarity and durability. The clarity of PET cups are unmatched by any other commonly used disposable plastic cup materials such as PP and PS. Karat® PET cold cups are not only freeze/heat resistant (-22°F to 180°F), but also crack resistant. Karat® PET cups are used for a wide range of products such as iced tea, slushes, juice, ice cream, cold beer and more. Unlike other plastics, Karat® PET is recyclable. It's resin identification is 1.
