PLA COLD CUP & LID

Customize With Your Own Logo
Order Minimum 100 Cases
Lead Time 10-12 Weeks
 One Time Set-up Fee Applies

Material Clear Eco-Friendly PLA
Sizes 3oz, 7oz, 8oz, 9oz, 10oz, 12oz, 16oz, 20oz, 24oz, 32oz
Designs Clear, Stock Print or Custom Print
Matching Lids Flat Lid, Dome Lid

Poly(lactic acid) or Polyactide (PLA) is a compostable polymer derived from 100% renewable resources. PLA, comparable to petroleum based plastic, is now used in a variety of industries including packaging, clothing, medicine and more. PLA is a nonvolatile and odorless polymer generally recognized as safe (GRAS) by FDA.

The life cycle of Karat® Earth PLA starts with starch rich plants such as corn, wheat and sugar beet. These plants are first milled to separate the starch, from which is unrefined dextrose is processed. The unrefined dextrose enters a fermentation process and the result is lactic acid. After condensation, two lactic acid molecules convert into one lactide. The lactide molecule is then purified through vacuum distillation and a solvent-free melt causes the ring shaped molecule to turn into long chain polymers.

Our Karat® Earth PLA is fully compostable in commercial composting facilities. It can be converted back to monomer and polymer, or, it can be compostable into water, carbon dioxide and organic materials.
